DISCOVER

Your child can participate in our exciting summer camp program: “Discover STEAM.” We offer a safe, fun environment for children to explore, play, learn, serve, & grow. We keep children active through innovative learning and fun activities.

STEAM is an educational approach to learning that uses Science, Technology, Engineering, the Arts, and Mathematics as access points for guiding inquiry, dialogue, & critical thinking. The end results are students who take thoughtful risks, engage in experiential learning, persist in problem-solving, embrace collaboration, and work through the creative process. These are the innovators, educators, leaders, and learners of the 21st century!
