Knight School - Extended Day Program

The number one goal of our extended day program is to offer your child an exciting, safe and comfortable space to be while parents are at work. Our extended day program is designed to offer families an affordable option which allows students to be dropped off early and picked up late from their school day. These services are offered to middle school and elementary aged students with a discounted rate for families with multiple students enrolled. Below you can read more information about how we seek to engage your children.

Squire Time

In our morning session, students will have the opportunity to practice relationship building skills as we encourage students to spend time reading, crafting or playing games together before school. Before being dismissed to classes, students will engage in a short devotional and prayer time to help them start their day off on the right path!

Skill Sharpening

At the end of a long day at school, students are welcomed to Extended Day with a quick snack. Students will then have a homework check in, followed by recess. After returning from recess, students will work independently or in small groups to complete homework assignments. Those without homework will be encouraged to read or choose brain games to play.

Comerade in Arms

After homework is complete, we like to encourage students to build relationships using their creativity and imaginations! We offer opportunities to create all kinds of arts and crafts as well as join together in cooperative play. This gives students a chance to form friendships across various age groups as well as allow them a chance to wind down from a busy day. Students are welcome to choose individual activities as well.

Noble Knights

This year we will begin a new program where teachers can drop by and commission a Noble Knight - student enrolled in Extended Day - to serve them in their classrooms for the afternoon by performing special tasks and helping with special projects.
